

PRODUCT DATA SHEET

Degassing Furnace for Electromagnetic Pure Iron (DT4C)

Degassing Furnace for Electromagnetic Pure Iron (DT4C) is intended for clean degassing of permalloy components, 1J79 magnetic alloy parts, and DT4C pure iron parts.

OVERVIEW

Product Overview

The Degassing Furnace for Electromagnetic Pure Iron (DT4C) is dedicated to vacuum degassing or clean thermal treatment of permalloy components, 1J79 magnetic alloy parts, and DT4C pure iron parts. It is suitable for users who need tighter process control, lower oxidation risk and more stable material quality during high-temperature treatment.

It can be integrated into routes where material cleanliness, gas removal efficiency and stable thermal cycles are important to final product performance.

MANUFACTURER

Yuanhang Industrial Furnace

Customized Furnace Engineering

Supplier of customized vacuum, atmosphere, graphitization, carbonization, sintering, brazing and CVD equipment with configurable structure, hot-zone dimensions and automation packages.

TECHNICAL FEATURES

Technical Features

Vacuum-focused configuration for cleaner thermal treatment and gas removal.

Suitable for high-purity metals, magnetic materials and sensitive alloys.

Supports stable heating, soaking and repeatable process control.

Can be integrated into demanding material-quality workflows.

APPLICATIONS

Typical Applications

- permalloy components
- 1J79 magnetic alloy parts
- DT4C pure iron parts
- magnetic materials
- pure iron and specialty metals

TECHNICAL DATA

Technical Data Tables

TABLE 1

参数项目	Parameter
炉罐材质	310S 或特种耐热不锈钢
Pressure Rise Rate	≤ 2 Pa/h (高Vacuum密封标准)
Hydrogen安全系统	自动防爆点火 + 紧急Nitrogen吹扫系统
Heating Element	优质瑞典 Kanthal 丝 / 高性能合金丝
Vacuum系统配置	机械泵 + 扩散泵 (或分子泵组)
Temperature Control Accuracy	±0.1°C (分段PID智能调节)

COMPANY PROFILE

Zhuzhou Yuanhang Industrial Furnace Technology Co., Ltd.

Manufacturer of High-Temperature Industrial Furnaces and Thermal Processing Equipment

Zhuzhou Yuanhang Industrial Furnace Technology Co., Ltd. (Yuanhang Industrial Furnace) is a manufacturing company based in China, Zhuzhou, Hunan, specializing in thermal processing equipment. Centered on heat treatment and high-temperature thermal engineering technologies, we provide customized equipment and complete process solutions for industrial and research applications.

With more than 10 years of dedicated industry experience, we have served over 100 customers. Our principal product portfolio covers graphitization furnaces, carbonization furnaces, vacuum sintering furnaces, silicon carbide sintering systems, CVD furnaces and related custom high-temperature process equipment.

Particular attention is given to practical automation. After the workpieces are loaded and the furnace door is closed, the programmed cycle can be started with one command, allowing the system to operate automatically through the defined process sequence. This helps improve repeatability and reduce dependence on operator experience.

For projects involving vacuum, ultra-high-temperature, brazing, carbonization, graphitization, sintering or CVD-related thermal processing equipment, Yuanhang Industrial Furnace can provide technical communication, configuration support and project-oriented engineering coordination.

- Graphitization and carbonization equipment for carbon materials, felt, carbon fiber and graphite products.
- Vacuum and atmosphere sintering systems for advanced ceramics, cemented carbide and refractory metals.

- Bottom-loading, multi-station and large-format CVD systems for demanding composite processing routes.
- Technical support for furnace selection, custom engineering, retrofit evaluation and process matching.
