

PRODUCT DATA SHEET

Bellows Heat Treatment Line

Bellows Heat Treatment Line is a configurable thermal processing solution for stainless steel components.

OVERVIEW

Product Overview

The Bellows Heat Treatment Line is a configurable thermal processing solution for stainless steel components. It can be adapted to different process temperatures, loading methods, atmosphere conditions and automation preferences according to project requirements.

The final structure, control package and performance range can all be adjusted according to the material route and the plant-side production target.

MANUFACTURER

Yuanhang Industrial Furnace

Customized Furnace Engineering

Supplier of customized vacuum, atmosphere, graphitization, carbonization, sintering, brazing and CVD equipment with configurable structure, hot-zone dimensions and automation packages.

Contact Information

Location: China, Zhuzhou, Hunan

TECHNICAL FEATURES

Technical Features

Configurable around temperature range, chamber size and process route.

Suitable for custom thermal processing projects with flexible engineering needs.

Focused on practical operation, stable thermal behavior and scalable design.

Can be tailored for laboratory, pilot or production applications.

APPLICATIONS

Typical Applications

- stainless steel components
- custom furnace projects
- pilot heat treatment
- special thermal routes

TECHNICAL DATA

Technical Data Tables

TABLE 1

参数项目	Parameter
Rated Temperature	950°C (长期稳定运行)
Temperature Control Accuracy	±0.1°C (分段PID智能调节)
炉温均匀性	±3°C 至 ±5°C (多区加热布局)
Ultimate Vacuum度	10 ⁻¹ Pa (常规) 至 10 ⁻³ Pa (高Vacuum可选)
Protective Atmosphere	N ₂ , Ar, H ₂ (流量计精准可调)
出料方式	Vertical上出料/下出料/Horizontal (支持定制)

COMPANY PROFILE

Zhuzhou Yuanhang Industrial Furnace Technology Co., Ltd.

Manufacturer of High-Temperature Industrial Furnaces and Thermal Processing Equipment

Zhuzhou Yuanhang Industrial Furnace Technology Co., Ltd. (Yuanhang Industrial Furnace) is a manufacturing company based in China, Zhuzhou, Hunan, specializing in thermal processing equipment. Centered on heat treatment and high-temperature thermal engineering technologies, we provide customized equipment and complete process solutions for industrial and research applications.

With more than 10 years of dedicated industry experience, we have served over 100 customers. Our principal product portfolio covers graphitization furnaces, carbonization furnaces, vacuum sintering furnaces, silicon carbide sintering systems, CVD furnaces and related custom high-temperature process equipment.

Particular attention is given to practical automation. After the workpieces are loaded and the furnace door is closed, the programmed cycle can be started with one command, allowing the system to operate automatically through the defined process sequence. This helps improve repeatability and reduce dependence on operator experience.

For projects involving vacuum, ultra-high-temperature, brazing, carbonization, graphitization, sintering or CVD-related thermal processing equipment, Yuanhang Industrial Furnace can provide technical communication, configuration support and project-oriented engineering coordination.

- Graphitization and carbonization equipment for carbon materials, felt, carbon fiber and graphite products.
- Vacuum and atmosphere sintering systems for advanced ceramics, cemented carbide and refractory metals.

- Bottom-loading, multi-station and large-format CVD systems for demanding composite processing routes.
- Technical support for furnace selection, custom engineering, retrofit evaluation and process matching.
