

PRODUCT DATA SHEET

Continuous Carbon Fiber Carbonization Furnace

Continuous Carbon Fiber Carbonization Furnace is developed for controlled carbonization of carbon fiber materials, carbon paper, graphite products, and fuel cell materials. Design temperature reference: up to 2800°C.

OVERVIEW

Product Overview

The Continuous Carbon Fiber Carbonization Furnace is developed for staged carbonization of carbon fiber materials, carbon paper, graphite products, and fuel cell materials. It supports process matching around loading size, atmosphere protection, heating rate and cooling strategy so that users can build a stable batch or continuous thermal route according to product structure and output rhythm.

For users working with fibers, felt, films or carbon preforms, the furnace can be matched to process rhythm, gas handling and working-zone dimensions while maintaining stable thermal ramping and practical maintenance access.

MANUFACTURER

Yuanhang Industrial Furnace

Customized Furnace Engineering

Supplier of customized vacuum, atmosphere, graphitization, carbonization, sintering, brazing and CVD equipment with configurable structure, hot-zone dimensions and automation packages.

TECHNICAL FEATURES

Technical Features

Supports staged carbonization with adjustable heating and atmosphere paths.

Suitable for felt, fiber, film and porous carbon precursor materials.

Configurable batch or continuous layouts according to production rhythm.

Designed for practical process stability, insulation efficiency and serviceability.

APPLICATIONS

Typical Applications

- carbon fiber materials
- carbon paper
- graphite products
- fuel cell materials
- precursor carbonization

TECHNICAL DATA

Technical Data Tables

TABLE 1

工艺模块	Working Temperature (°C)	发热元件	典型开口尺寸 (mm)	控温组数
低温排焦段	850	High Temperature电阻丝	H150 × W800 × L4000	2 区
中温Carbonization段	1650	硅碳棒 / 高纯Graphite	□1300 × 120 (高度可调)	3 区
High TemperatureGraphitization	2800 - 3000	高纯Graphite发热体	按工艺定制	多区独立

COMPANY PROFILE

Zhuzhou Yuanhang Industrial Furnace Technology Co., Ltd.

Manufacturer of High-Temperature Industrial Furnaces and Thermal Processing Equipment

Zhuzhou Yuanhang Industrial Furnace Technology Co., Ltd. (Yuanhang Industrial Furnace) is a manufacturing company based in China, Zhuzhou, Hunan, specializing in thermal processing equipment. Centered on heat treatment and high-temperature thermal engineering technologies, we provide customized equipment and complete process solutions for industrial and research applications.

With more than 10 years of dedicated industry experience, we have served over 100 customers. Our principal product portfolio covers graphitization furnaces, carbonization furnaces, vacuum sintering furnaces, silicon carbide sintering systems, CVD furnaces and related custom high-temperature process equipment.

Particular attention is given to practical automation. After the workpieces are loaded and the furnace door is closed, the programmed cycle can be started with one command, allowing the system to operate automatically through the defined process sequence. This helps improve repeatability and reduce dependence on operator experience.

For projects involving vacuum, ultra-high-temperature, brazing, carbonization, graphitization, sintering or CVD-related thermal processing equipment, Yuanhang Industrial Furnace can provide technical communication, configuration support and project-oriented engineering coordination.

- Graphitization and carbonization equipment for carbon materials, felt, carbon fiber and graphite products.
- Vacuum and atmosphere sintering systems for advanced ceramics, cemented carbide and refractory metals.

- Bottom-loading, multi-station and large-format CVD systems for demanding composite processing routes.
- Technical support for furnace selection, custom engineering, retrofit evaluation and process matching.
