

PRODUCT DATA SHEET

Continuous Brazing and Sintering Furnace for VC Ultra-Thin Liquid Cooling Plates

Continuous Brazing and Sintering Furnace for VC Ultra-Thin Liquid Cooling Plates is intended for clean brazing and thermal joining of liquid cooling plates.

Image available upon request

OVERVIEW

Product Overview

The Continuous Brazing and Sintering Furnace for VC Ultra-Thin Liquid Cooling Plates is intended for vacuum or protective-atmosphere brazing of liquid cooling plates. The system is designed to improve joint quality, reduce oxidation risk and support consistent heating, soaking and cooling for precision components or production fixtures.

In practical use, the equipment can be configured around part size, joint quality targets, production cadence and cooling requirements. This makes it suitable for custom fixtures, heat spreaders, electronic assemblies and other brazed structures.

MANUFACTURER

Yuanhang Industrial Furnace

Customized Furnace Engineering

Supplier of customized vacuum, atmosphere, graphitization, carbonization, sintering, brazing and CVD equipment with configurable structure, hot-zone dimensions and automation packages.

TECHNICAL FEATURES

Technical Features

Vacuum or atmosphere process compatibility for cleaner brazed joints.

Configurable loading, heating and cooling logic for precision assemblies.

Suitable for thin plates, electronic structures and specialized joining workpieces.

Supports repeatable production with practical plant-side operation.

APPLICATIONS

Typical Applications

- liquid cooling plates
- vacuum brazing
- precision joining
- thermal management assemblies

Technical Data Tables

TABLE 1

Working Zone间	宽mmX高mm	200X100	400X150	500X200	600X300
工作温度	°C	950	950	950	950
温度均匀性	±°C	1	1	1	1
Nitrogen用量	立方/h	5	5	7	10
氮氢混气用量	立方/h	2	4	6	6
用电功率	KW	40	50	50	80
冷却水	立方/h	20	20	30	30
加热区长度	米	4	4	4	4
还原段长度	米	2	2	3	5
冷却长度	米	5	5	5	5
行进速度	mm/min	10	10	15	20

注1：各区长度及行进速度根据实际工艺进行调整

注2：Working Zone间宽度指High Temperature网带实际可用宽度

COMPANY PROFILE

Zhuzhou Yuanhang Industrial Furnace Technology Co., Ltd.

Manufacturer of High-Temperature Industrial Furnaces and Thermal Processing Equipment

Zhuzhou Yuanhang Industrial Furnace Technology Co., Ltd. (Yuanhang Industrial Furnace) is a manufacturing company based in China, Zhuzhou, Hunan, specializing in thermal processing equipment. Centered on heat treatment and high-temperature thermal engineering technologies, we provide customized equipment and complete process solutions for industrial and research applications.

With more than 10 years of dedicated industry experience, we have served over 100 customers. Our principal product portfolio covers graphitization furnaces, carbonization furnaces, vacuum sintering furnaces, silicon carbide sintering systems, CVD furnaces and related custom high-temperature process equipment.

Particular attention is given to practical automation. After the workpieces are loaded and the furnace door is closed, the programmed cycle can be started with one command, allowing the system to operate automatically through the defined process sequence. This helps improve repeatability and reduce dependence on operator experience.

For projects involving vacuum, ultra-high-temperature, brazing, carbonization, graphitization, sintering or CVD-related thermal processing equipment, Yuanhang Industrial Furnace can provide technical communication, configuration support and project-oriented engineering coordination.

- Graphitization and carbonization equipment for carbon materials, felt, carbon fiber and graphite products.
- Vacuum and atmosphere sintering systems for advanced ceramics, cemented carbide and refractory metals.

- Bottom-loading, multi-station and large-format CVD systems for demanding composite processing routes.
- Technical support for furnace selection, custom engineering, retrofit evaluation and process matching.
