

## PRODUCT DATA SHEET

# RMI Sintering Furnace for Carbon-Ceramic Composites

RMI Sintering Furnace for Carbon-Ceramic Composites is prepared for densification and infiltration of polyimide-based films and carbon-ceramic composites. Design temperature reference: up to 2300°C.

## OVERVIEW

### Product Overview

The RMI Sintering Furnace for Carbon-Ceramic Composites is designed for infiltration, pyrolysis, densification or siliconizing routes used in carbon-ceramic composite manufacturing. It supports stable processing of polyimide-based films and carbon-ceramic composites while allowing the hot-zone structure and thermal cycle to be adapted to different preforms and process stages.

This type of system is usually matched to preform loading, atmosphere route, temperature staging and post-process densification goals. It is appropriate for customers building repeatable composite manufacturing processes.

## MANUFACTURER

### Yuanhang Industrial Furnace

#### Customized Furnace Engineering

Supplier of customized vacuum, atmosphere, graphitization, carbonization, sintering, brazing and CVD equipment with configurable structure, hot-zone dimensions and automation packages.

#### Contact Information

Phone: +86 15115399105

Website: <https://www.hnyhgyl.com>

Location: China, Zhuzhou, Hunan

## TECHNICAL FEATURES

# Technical Features

Supports impregnation, pyrolysis, PIP, siliconizing or RMI-related composite routes.

Configurable around preform size, densification stage and thermal cycle design.

Suitable for repeatable processing of carbon-ceramic composite structures.

Can be matched to pilot verification or production-oriented process scaling.

## APPLICATIONS

# Typical Applications

- polyimide-based films
- carbon-ceramic composites
- carbon-ceramic densification
- composite preform treatment
- high-temperature structural composites

## TECHNICAL DATA

# Technical Data Tables

TABLE 1

设计温度	2100°C (最高可达 2300°C)
Heating Method	等静压Graphite电阻加热 (低压大电流方式)
Temperature Control Accuracy	全温段 $\leq \pm 2^\circ\text{C}$ (PID+AI拟合技术)
工作Atmosphere	Vacuum、Ar/N <sub>2</sub> 保护、还原Atmosphere (微正压)
Vacuum系统	2H-70滑阀泵, Pressure Rise Rate $\leq 10\text{Pa/h}$
Control System	西门子PLC + 台达15寸触摸屏 + 无纸记录仪

## COMPANY PROFILE

# Zhuzhou Yuanhang Industrial Furnace Technology Co., Ltd.

Manufacturer of High-Temperature Industrial Furnaces and Thermal Processing Equipment

Zhuzhou Yuanhang Industrial Furnace Technology Co., Ltd. (Yuanhang Industrial Furnace) is a manufacturing company based in China, Zhuzhou, Hunan, specializing in thermal processing equipment. Centered on heat treatment and high-temperature thermal engineering technologies, we provide customized equipment and complete process solutions for industrial and research applications.

With more than 10 years of dedicated industry experience, we have served over 100 customers. Our principal product portfolio covers graphitization furnaces, carbonization furnaces, vacuum sintering furnaces, silicon carbide sintering systems, CVD furnaces and related custom high-temperature process equipment.

Particular attention is given to practical automation. After the workpieces are loaded and the furnace door is closed, the programmed cycle can be started with one command, allowing the system to operate automatically through the defined process sequence. This helps improve repeatability and reduce dependence on operator experience.

For projects involving vacuum, ultra-high-temperature, brazing, carbonization, graphitization, sintering or CVD-related thermal processing equipment, Yuanhang Industrial Furnace can provide technical communication, configuration support and project-oriented engineering coordination.

- Graphitization and carbonization equipment for carbon materials, felt, carbon fiber and graphite products.
- Vacuum and atmosphere sintering systems for advanced ceramics, cemented carbide and refractory metals.

- Bottom-loading, multi-station and large-format CVD systems for demanding composite processing routes.
- Technical support for furnace selection, custom engineering, retrofit evaluation and process matching.
